Incidental Subdivision Checklist

- Application. Completed application required at time of application submittal.
- Fee. Payment of the application fee.
- Deed. Copy of the warranty deed.
- Survey. Survey of the property signed and sealed by a registered land surveyor with the State of Arkansas showing the following information:
 - Lot configuration including bearings and distances and size for each existing lot.
 - Lot configuration including bearings and distances and size for each proposed lot.
 - Legal description of parent tract and tracts on split.
 - Dimensions of right-of-way from centerline.
 - All easements – present and proposed.
 - Legend (sidewalks, hydrants, building setbacks, etc.)
 - Zoning of property.
 - Floodplain notes.
 - Vicinity map (1mile radius indicating several North/South streets and East/West streets), as well as North arrow.
- Plat. Submittal of Ten (10) copies to the Planning Office at the time of application. When approved, plats must be signed prior to acceptance by the Planning Department.

Lot Splits and Property Line Adjustments

What is a Lot Split?

A lot split divides a piece of property, regardless of size, into two pieces of property. Technically, a lot split is a waiver of preliminary plat requirements, final plat requirements, and subdivision requirements.

What is a property line adjustment?

A property line adjustment is any adjustment of property lines that does not create a new lot. You cannot alter a lot in such a way that would create an illegal situation in terms of setbacks, required lot width, required lot size, or buildable area.

Who must approve a lot split?

The Planning Commission, both the City and County must approve splits of property located outside the City limits but within the growth area or Planning area.

Subdivision covenants may restrict further splitting of your property. Please check with your Property Owners Association before filing an application.

Please Note: One (1) Lot Split every Three (3) years.

How much will a lot split cost?

The fees for a lot split are: \$125.00 application fee. You will probably incur other costs too, such as the cost of a survey and the cost of having a new abstract prepared.

In addition to these costs, the Planning Commission may make the lot split contingent on other improvements, such as sidewalks, extensions of water lines, and street improvements. Dedications of easements and right-of-ways are also required in most cases.

Do the lots have to be a certain size?

It is important to note that all lots still must meet zoning requirements. For example, A-1 (Agricultural zone) you must have a minimum street frontage of 150-feet with a minimum lot size of 3 acres. In an R-1 (Low Density Residential zone) the lot size requirements are a minimum of 100-foot street frontage with a minimum of 1 acre.

Does the city approve lots splits outside the city limits?

Yes, if the land is outside Little Flock City limits but within the Planning area. A map of the Planning area is available at Little Flock City Hall.

Incidental Subdivision Plat / Survey Specifications

The Following information shall appear on the plat or survey:

1. Property lines of all property owners to the exterior boundaries of the project shall be located on the plat at the location of their property.
2. Names, addresses, telephone numbers and fax numbers, if available, of all parties involved in the project. Include registration and license number.
3. North arrow, scale, dates of preparation, all adjacent zoning classification and proposed use.
4. Provide a complete and accurate legend.
5. Boundary survey of the property shown on the plat / plan. The surveyor shall seal, sign and date the survey. The survey shall be tied to State Plane Coordinates on two controlling corners of the property.
6. Written legal descriptions, including area in square feet or acres that read clockwise. (Note: If the project is contained in more than one tract, the legal for each individual tract and a total tract description must be provided.)
7. Curve data for any street, which forms a project boundary. Curve data shall include radius and arc distance.
8. Street right-of-way lines clearly labeled. The drawing shall depict any future R.O.W. needs as determined by the AHTD and Master Street Plan. Future R.O.W. as well as existing R.O.W. and centerlines should be shown and dimensioned.
9. The location of all existing structures. Dimension building and setbacks from the building side to property lines. Do not show setback line, only dimensions.

Easements

10. Show all known on-site and off-site existing utilities and easements (dimensioned) and provide all structure locations, types and condition and note them as "existing".
11. Existing easements shall show the name of the easement holder and purpose of the easement. If an easement is blanket or indeterminate in nature, a note to this effect shall be placed on the plat or plan.
12. The width, approximate locations, and purposes of all proposed easements or right-of-way for utilities, drainage, sewers, flood control, ingress-egress or other public purposes within and adjacent to the project.
13. Identify and dimension all access easements, including egress and ingress.

Subdivision of Land

14. The lot layout, the dimensions of each lot, number of each lot, total area in square feet or acreage to the nearest one-hundredth (1/100th) acre of each lot, and the approximate finish grade where pads are proposed for building sites. Lots shall be numbered consecutively for all phases. These numbers shall be associated with each phase of the subdivision. Avoid using blocks. The total number of lots shall be indicated on the plat.
